

## **BIODIVERSITY POLICY**

Tata Steel Special Economic Zone Limited (TSSEZL) is committed to the conservation, enhancement, and restoration of biodiversity in our area of project and operation. This policy provides guidelines for including biodiversity in our strategic and operational decision making.

- We will conduct biodiversity assessments in all our present and prospective areas of operation. These biodiversity assessments will provide baseline for the preparation of biodiversity management plans.
- For Tata Steel Special Economic Zone projects, the goal will be to minimise impact, with the aim of achieving No Net Loss of biodiversity.
- We will develop biodiversity management plans for our site and set targets for the conservation, enhancement, and restoration of biodiversity within our areas of project and operation. We will give priority to conservation of: keystone species which have special conservation status, species known to have historically inhabited the area and species with a history of traditional use and value to local communities.
- We will optimize our progressive reclamation activities and promote conservation of indigenous species of flora and fauna.
- We will collaborate with stakeholders to ensure long-term conservation of native species in and around the areas of our project and operations.
- We will actively and continuously pursue the development and application of systems and technologies to reduce our impacts on biodiversity.
- We will work on promoting collection analysis and enhancement of biodiversity information and knowledge in collaboration with experts.
